

Optimize R&D with AI-powered analysis

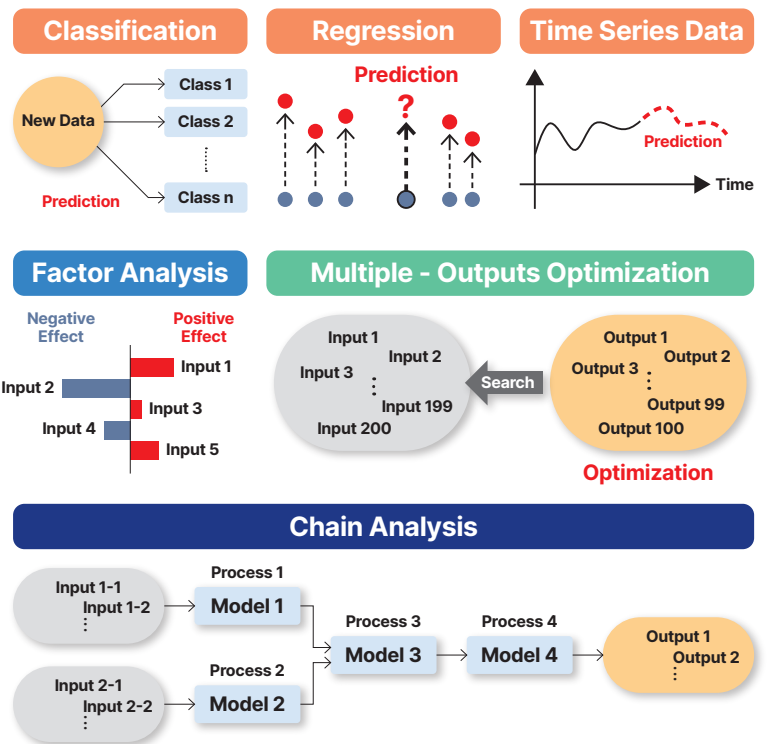

Multi-Sigma® democratizes sophisticated AI analysis techniques while cutting time and costs associated with R&D experimentation

Multi-Sigma®

No-Code and Cloud-Based Explainable AI

- ✓ Cloud-based application
- ✓ Highly accurate prediction
- ✓ Explainability through factor analysis
- ✓ Multiple-outputs optimization

Applicable to a variety of fields:

Mechanical Engineering

Agriculture

Healthcare & Medical Sciences

Sales and Marketing

Chemical Engineering

Trusted by 100 + leading organizations:

Trusted Security with Environmental Responsibility

- Hosted securely on Google Cloud
- Data recovery ensured even in disaster scenarios
- Regular penetration testing by third-party experts
- CO₂-free cloud infrastructure

Dr. Kotaro Kawajiri

Founder, AI Expert, Head of R&D

1 From Standard to Superior

Conventional Solutions	VS	Multi-Sigma®
Large-Scale	 Data Required	Small
Moderate	 Accuracy	High
Black-box	 Model Interpretability	Explainable
Single Target Variable	 Output	Multiple Target Variables
Expert Knowledge Required	 Expertise	No Expert Knowledge Required
Code Required	 Programming	No-Code
High-End Hardware Required	 Machine Specifications	No High-End Hardware Required (cloud-based)

2 Cost Reduction and Productivity Improvement

Case 1 Materials Engineering

7,200 experiments are typically required

Only **30 to 60** experiments can be sufficient
Multi-Sigma® successfully reduced the number of experiments by more than **99%**

Case 2 Agriculture

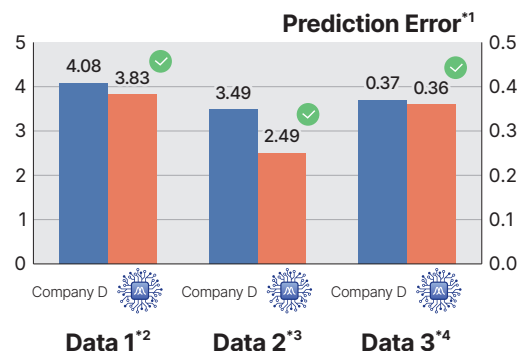

Crop yield **prediction** is extremely **challenging**

High-accuracy predictions can be achieved
up to 5 weeks in advance
Multi-Sigma® provides highly accurate yield predictions, making **strategic logistics** and **sales planning** possible

3 Unmatched Performance

Multi-Sigma® can achieve predictions with even **smaller errors** than the industry-leading product.
A significant contribution to **decision-making precision** and **operational efficiency**.

*1 : Error is evaluated using Root Mean Squared Error (RMSE),
*2 : Concrete compressive strength (plotted against the left y-axis),
*3 : Boston house prices (plotted against the left y-axis),
*4 : Pima indian diabetes data (plotted against the right y-axis).
(All the data are from Kaggle: <https://www.kaggle.com/datasets>)

Consulting Services

We, AIZOTH, also have a team of experts, including PhD holders in fields such as engineering, commerce & management, science, and statistics, as well as AI engineers and former researchers from national research institutes.

Training and Lectures:

We offer expert-led lectures and training on AI analysis and Multi-Sigma®. We also provide hands-on data analysis using your own data, tailored to your needs.

R & D support:

We collaborate with your team through regular meetings to track progress, exchange insights, and align with your goals. Our support covers everything from data analysis to AI application development, tailored to your needs.
